## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 9 to 11, drawn to a method of making Sm-Fe-N alloy powder comprising co-precipitating Sm and Fe, calcining the precipitate to form a metal oxide, reducing the metal oxide to form Sm-Fe alloy powder and nitriding the alloy powder to form Sm-Fe-N alloy powder.

Group II, claim(s) 12, drawn to a process of producing Sm-Fe-N alloy powder by heating a mixture of  $\text{Sm}_2\text{O}_3$  having an average particle size of less than 5  $\mu\text{m}$  and an iron oxide having an average particle size of less than 2  $\mu\text{m}$  at a temperature of 300 to 900°C in a reducing atmosphere to reduce the iron oxide to metallic iron and subjecting the resulting mixture to reduction-diffusion with metal Ca or CaH.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All of the groups are directed to Sm-Fe-N alloys but each group has different special technical features.

Group I has a special technical feature directed to a process of making a Sm-Fe-N alloy powder comprising precipitating Sm and Fe from a liquid solution, calcining the Sm and Fe to form oxides, reducing the oxides to Sm-Fe alloy powder and nitriding the Sm-Fe powder.

Group II has a special technical feature direct to a process of making Sm-Fe-N alloy powder comprising reducing  $\text{Sm}_2\text{O}_3$  and an iron oxide in a preliminary reduction step and further reduction using Ca or CaH.

Art Unit: 1742

A telephone call was made to Mr. Barry E. Bretschneider on April 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)..

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
